

# Infodemiology Early Warning System

Weekly Outbreak Intelligence Report  
Generated: 2026-05-27 11:52

## Executive Summary

Total Alerts: 4  
Critical Alerts: 1  
Countries Under Watch: 4

This report summarizes outbreak intelligence detected from: Google Trends, Reddit signals, WHO surveillance, and AI anomaly detection.

| Disease   | Country      | Source        | Severity | Risk Score |
|-----------|--------------|---------------|----------|------------|
| Influenza | India        | Google Trends | HIGH     | 82.5       |
| COVID-19  | South Africa | WHO           | CRITICAL | 96.1       |
| Malaria   | Malawi       | AI Prediction | MEDIUM   | 71.4       |
| Dengue    | Brazil       | Reddit        | HIGH     | 89.7       |

## AI Recommendations

- Increase surveillance in high-risk countries.
- Monitor disease spread across neighboring regions.
- Continue anomaly monitoring every 15 minutes.
- Investigate abnormal Google Trends spikes.
